

SEAOSC Seminar

Post-Disaster Safety Assessment Evaluator Training

By The SEAOSC Disaster Emergency Committee

Saturday, May 10, 2008

8 a.m. - 3 p.m.

The Grand Event Center, 4101 E. Willow Blvd., Long Beach CA 90815

This training will provide a comprehensive overview of the Office of Emergency Services (OES) Safety Assessment Program, practical building evaluation exercises, criteria for assessing the degree of severity of facility and lifeline systems damage, and procedures for posting and barricading. Other hazards will also be covered. The ATC 20-1 Field Manual: "Post-Earthquake Safety Evaluation of Buildings, Second Edition," and additional training materials will be provided.

"All registered SAP evaluators must be professionally registered engineers, professionally licensed architects, certified building officials or inspectors. They must also have a general knowledge of construction, professional experience and judgment." One may attend the training without the above qualification, but will not receive a State-issued OES card. Those already possessing an OES card, should check their expiration date. State-issued cards expire five years after the training date. **Please note that older OES cards with indefinite expirations are no longer valid or recognized by OES.**

Licensed or certified professionals who are members of ASCE, AIA, SEAOC, or CALBO will receive a new SAP volunteer card and will be allowed to "tag" buildings in the event of a disaster. This process is not intended to identify or quantify damaged facilities, but to evaluate their potential for safe use.
